

Current Antibodies for IHC Testing

Note: Not all antibodies have been assessed for cross-reactivity to different species. For specific cross-reactivity information, please contact Denise in Histology 860-486-3740.

Actin, Smooth muscle (1A4)

Actin, Muscle Specific (HHF-35)

Bovine Viral Diarrhea virus (BVD)

Calicivirus

Canine Distemper Virus

CD3 (T cell)

CD68 (KP-1)

CD79a (B cell)

Chromogranin

Clostridium perfringens (special permission required)

Collagen IV

Coronavirus

Cytokeratin, pan

Desmin (monoclonal)

D2-40

Epithelial Membrane Antigen

Factor VIII (Von Willebrand's Factor)

Feline Herpes

Feline Infectious Peritonitis Virus

Feline Pan Leukopenia Virus (order Parvovirus)

GFAP (Glial Fibrillary Acidic Protein)

Histiocyte/Myeloid Antigen (MAC 387)

Leukocyte Common Antigen (Pan-Leukocyte- CD20)

Listeria

Lysozyme

Melan A

Mink Enterovirus (order Parvovirus)

Mycobacterium bovis

Muscle Specific Actin (HHF-35)

Myeloid/Histiocyte Antigen (MAC 387)

Myoglobin

Neurofilaments

Parvovirus

Porcine Circovirus 2

Rabies

Smooth Muscle Actin (1A4)

S100

Synaptophysin

Toxoplasma gondii

Vimentin

Von Willebrand's Factor (Factor VIII)
